Steeplessness Restloance,
Dyspepsia, Dizzines,
on, Liver Complaints, Childrens Troubles,
Consumption, 4c, 4c, 4c, 4c.

Take care of Yourself. often used for nervous complaints, and is wholly free from any deleterious drugs whatsoever. Tens of thousands are testifying to its curative powers. See pamphlet accompanying each bottle.

Some folks can't sleep nights

Dodd's Nervine is a COMPLETE SPECIFIC for steepleamess, It soothes the throttling musels like magic, and tranquilizes the mind. And every-body knows that GOOD SLEEP is better than all

Ladies in poor Health. The Nervine is also one of the best remedies ever employed in the cure of the numerous and troublescome silments known as FEMALK COMPLAINTS. See pamphtet.

Look out for Colds.

It is proverbial that people treat a cold (and the generally accesspaning cough) as something that will cure itself; but neglect is serious and sometimes fatal. The fame of DODPS NER-VINE in the relief of colds is established. Use this standard remedy, and so far abstain from tiquides of sell kinds as to keep somewhat thirsty for a few days, and the worst cold will some be gone.

Children's Diseases. For WHOOPING COUGH Dodd's Nervis See recommendations in pamphlet. For the diseases which affliet CHILDREN WHEN TEETH-ING nothing can farnish more instant or grate-

Be careful what medicines you take.

Alesholic stimulants are injurious to the nervous health, and are ALWAYS followed by depressing RRACTION. The strength that Dodd Nervine gives is the STRENGTH OF HEALTH and COMES TO STAY. Beware of the whiskey preparations that have laid the foundations of so many habits of intemperance. Whether under the name of Bitters or otherwise, let the villainous compounds alone. Better die of honest discous compounds alone. ous compounds alone. Better die of honest dis-ease than be burnt up by the fires of alcohol. For the ingredients that compose Dodd's Kervins see pamphies on each bottle. For sale by Druggiste and Country Stores Price One Dollar.

the bed of that stream. Mr. Trombly tom. dug the well in the autumn of 1857. In reached a bed of gravel in which water 378 feet.

MYSTERIES OF MORMONISM exclude them from the use of the water from the latter part of November until exclude them from the use of the water Home for February.

hole through the ice.

The following month he again visited the well, and found that although the quantity of ice had greatly diminished, a hole two inches in diameter, taking out the large as a wash-tub.

The following month he again visited difference in cost. With one of these machines it ought not to cost more than fifty cents to one dollar per foot to bore a hole two inches in diameter, taking out the large and light? yet that a mass as large as a wash-tub the core for testing. In other words six-teen to fifty such holes can be bored for testing the water.

The core for testing the words six-teen to fifty such holes can be bored for testing the will break the sullen gloom:

Your readers have had a long rest from my epistolary correspondence, and perhaps now some idle one who has "nothing else to do" may bear with me, and read what little I can say. I am now in the great city of the still-called west, though this is far east to the inhabitants of the "Sunset Land." It required a spasmodic effort of mind, heart and pocket, to purchase for myself a ticket which would bear me far away from Vermont, and the many happy associations which cluster around my homes among her hills. No nobler souls exist than those of the Green Mountain State; and strangers find homes in the hearts of her people. When I tore myself from her embrace I felt as if I was leaving a kind mother, though I was but an adopted child, a second time being thrown into the cold, strange world. Yet this world is as we make it, a dark, damp prison if we are cynical, smileless creatures; a garden where flowers are ever blooming and birds ever singing, if cheerfulness and content reign in the heart

The variety of these virtues is observable

in every section, but I believe the go-ahead westerners have them in a less de-

gree than the steady easterners. Every-

one is after a fortune, and nothing short

Cutcago, April 9, 1870,

will satisfy.

My route to Chicago lay across seven states, through a painfully level-and rich country. It took us about twenty-four hours to run across the state of New York, and a finer road, for an old one than the N. Y. Central is not to be found in our country. Over its double track trains rush every half hour, bearing immense loads of merchandise and people in either direction. Only once did our serene temper become very much clouded, and that was at Schenectady, where we waited several kours. During our sojourn we changed the name to Unconnec tady, but do not recollect of getting very much satisfaction from this poor pun. Leaving this road we took the Lake Shore and Southern Michigan, and after a jour-ney of two days and nights we smoked into the smoky city of C. I suppose that I shall be permitted to give my opinion of this western metropolis, and I feel that I am somewhat acquainted with it, as the most of my time thus far has been spent in visiting its different parts. Though there is, of a necessity, very much to in-terest, instruct, and please, as a whole I do not like it. It is essentially a dirty place. Terribly muddy in wet weather, slightly detrimental to white linen. The city appears to me like a great overgrown child, that ever looks unclean and unat-tractive. Nature has done nothing, and art but little, as yet, to beautify. ground on which it stands is very low and marshy, and a cellar under a house nere would be only the receptacle of filthy wat condition of the streets, such as raising
